- Bachelor of Computer Applications  
*Mahatma Gandhi University*  
Completed in 2017

### About Me

I am a skilled full-stack developer specializing in PHP and the Laravel framework. With a focus on creating efficient and scalable web applications, I have a strong track record of turning complex ideas into functional solutions. I am proficient in front-end technologies such as HTML, CSS, Bootstrap ,JavaScript ,jQuery and React, as well as back-end technologies like MySQL.

### Professional Experience

#### GALTech Technologies

Full Stack Development Trainee

*March6,2023– Present*

<https://www.galtech.org/>

Key responsibilities:

- Learn and understand the Laravel framework, including its MVC architecture, routing and middleware.
- Assist in the implementation of front-end designs using HTML, CSS, and JavaScript frameworks.
- Learn to write and optimize database queries using MySQL or other relational database systems.
- Actively participate in training sessions, workshops, and knowledge sharing activities to enhance my skills and knowledge.

### Project

wellmixa

*Shopify E-commerce website*

Key responsibilities:

- Familiarizing myself with Shopify: Learn the ins and outs of the Shopify platform, including its features, settings, and integrations. This includes understanding the admin dashboard, product management, inventory management, and order processing.
- Product management: Assist in adding new products to the Shopify store. This involves gathering product information, such as titles, descriptions, pricing, and images. You may also need to categorize products and set up variants (e.g., size, color).
- Theme customization: Assist in customizing the Shopify theme to match the brand's visual identity. This may include modifying colors, fonts, and layouts, as well as implementing custom design elements or integrating third-party themes.

### Training And Certification

Full Stack Developer

*GALTech School of Technology*
